

Papermaking Science and Technology

a book series
covering the latest
technology and
future trends

Book 10

Papermaking Part 3, Finishing

Second Edition

Totally updated version

Book editor

Rautiainen, Pentti, M.Sc. (Eng.), Senior Paper Technology Manager, Paper business line, Metso Paper, Inc.

Publisher

Paper Engineers' Association/Paperi ja Puu Oy

Paperi ja Puu Oy

Table of Contents

1	Calendering.....	10
2	Reeling and winding.....	173
3	Roll wrapping and handling.....	284
4	Sheet finishing.....	326
	Conversion factors.....	399
	Index.....	401

CHAPTER 1

Calendering

1	Introduction.....	14
1.1	Introduction to calendering.....	14
1.2	History of calendering.....	15
1.3	Current trends.....	17
2	Calendering process.....	18
2.1	Basic mechanisms in calendering.....	18
2.2	Calendering parameters.....	19
2.2.1	Nip pressure.....	19
2.2.2	Residence time.....	21
2.2.3	Surface roughness.....	23
2.3	Plasticity of paper.....	23
2.3.1	Deformation of polymers.....	23
2.3.2	Softening of polymers in calendering.....	25
2.4	Modelling of the calendering process.....	28
2.4.1	Mathematical and empirical modelling approaches.....	28
2.4.2	Considerations on calender nip mechanics.....	29
2.4.3	Modelling of paper compression in calendering.....	30
2.4.4	Modelling of heat and mass transport in calendering.....	33
3	Calender types.....	35
3.1	Hard-nip calender.....	35
3.1.1	Hard-nip calendering process.....	36
3.1.2	Hard-nip calender concepts.....	38
3.2	Soft calender.....	42
3.2.1	Soft calendering process.....	42
3.2.2	Soft calender concepts.....	43
3.3	Supercalender.....	48

3.4	Multi-nip calender.....	54
3.4.1	Janus calender	55
3.4.2	OptiLoad calender	57
3.4.3	ProSoft calender	59
3.5	Shoe-nip calender.....	60
3.6	Metal belt calendering	61
3.7	Special calenders.....	64
3.7.1	Wet stack	64
3.7.2	Breaker stack.....	65
3.7.3	Friction calender	66
3.7.4	Other special calenders.....	66
4	Calendering process application areas	67
4.1	Wood-containing paper grades	67
4.1.1	Newsprint	67
4.1.2	SC paper	70
4.1.3	Coated wood-containing paper grades	72
4.2	Woodfree paper grades.....	74
4.2.1	Woodfree uncoated papers.....	74
4.2.2	Woodfree coated papers	76
4.3	Containerboards.....	79
4.4	Cartonboards	80
4.4.1	Introduction.....	80
4.4.2	Precalendering before coating.....	81
4.4.3	Final calendering.....	82
4.4.4	Uncoated liquid packaging board	83
4.5	Specialty papers: Release and coated label paper	83
4.5.1	Introduction.....	83
4.5.2	Calendering method.....	84
5	Calender construction	84
5.1	Calender frames and loading	84
5.1.1	Deflection-compensated rolls in calenders	88
5.1.2	CD profile-control rolls	94
5.1.3	Heated rolls.....	95
5.1.4	Elastic-covered rolls.....	99

CHAPTER 1

5.2	Profiling Actuators.....	109
5.2.1	Calender steam box	110
5.2.2	Moisturiser.....	111
5.2.3	Induction heater	113
5.3	Tail threading in on-line calendering	114
5.3.1	Cutting of the sheet.....	117
5.3.2	Tail cut-off device.....	118
5.3.3	Belt conveyors	120
5.3.4	Rope-assisted tail threading.....	121
5.3.5	Automation	122
5.3.6	Drives	123
5.3.7	Paper quality.....	123
5.3.8	Ropeless threading	123
5.4	Tail threading equipment in off-line calenders.....	124
5.5	Heating and cooling systems.....	125
5.5.1	Heat transfer	125
5.5.2	Heat transfer media	125
5.5.3	Flow circuits	127
5.6	HEP panels (hydraulic, electric and pneumatic)	129
5.7	Auxiliary equipment	130
5.7.1	Fly rolls	130
5.7.2	Spreader rolls	130
5.7.3	Paper guide rolls	131
5.7.4	Cooling rolls.....	131
5.7.5	Doctors	131
5.7.6	Trim cutters.....	132
5.7.7	Web break photocells.....	132
5.7.8	Web cutting devices.....	132
5.7.9	Vibration monitoring systems	132
5.7.10	Roll off-set devices	133
5.7.11	Lifting platform	133
5.7.12	WIS (Web Inspection System)	133
5.8	Unwind and windup	134
5.8.1	Unwind	134
5.8.2	Windup	136

6	Process control and automation	137
6.1	Machine automation	139
6.2	On-line measurements.....	144
6.3	Quality controls and actuators	150
7	Runnability of calender	161
7.1	Shutdowns.....	161
7.2	Barring.....	161
7.3	Web breaks.....	162
	7.3.1 Simplified view of web breaks.....	163
	7.3.2 Tension control.....	165
	7.3.3 Break detection.....	165
	7.3.4 Break cameras and defect sensors	165
	References	167

CHAPTER 2

Reeling and winding

1	Introduction.....	176
2	Reeling and winding in papermaking.....	178
2.1	Winding requirements.....	178
3	Effect of paper properties on winding.....	179
4	Effect of winding on paper properties.....	181
4.1	Roll quality measurements.....	182
4.1.1	Roll surface hardness.....	182
4.1.2	Pull-tab measurement (roll bottom tightness).....	183
4.1.3	Roll tightness.....	184
4.1.4	Elastic modulus (z-direction).....	185
4.1.5	Coefficient of friction.....	185
4.2	Intelligent roll technologies.....	185
4.3	Intelligent roll for reeling and winding.....	187
4.4	Intelligent roll-based web tension profile measurement and control.....	188
4.5	Portable intelligent roll technology for process analyses and maintenance services.....	188
4.6	Online profile control.....	189
4.6.1	Web tension profile.....	189
4.6.2	Roll hardness / diameter profiles and replacing inaccurate caliper measurement.....	190
5	Reeling.....	192
5.1	Reeling process.....	192
5.1.1	Reeling parameters.....	193
5.1.2	Stresses inside parent roll.....	198
5.1.3	Parent roll structure.....	201
5.1.4	Air entrapment at reel.....	204
5.1.5	Reeling defects.....	205

CHAPTER 2

5.2	Reel types and design.....	208
5.2.1	Pope reel.....	208
5.2.2	Second-generation reels.....	209
5.2.3	Reel parts.....	212
5.2.4	Reels with lay-on roll.....	218
5.2.5	Rereeler.....	219
5.3	Production efficiency.....	220
5.4	Parent roll handling.....	225
5.4.1	Crane-based parent roll handling.....	227
5.4.2	Parent roll handling on transfer rails.....	228
5.4.3	Parent roll handling with rail cart.....	229
5.4.4	Parent roll storage and waste pulping.....	229
6	Winding.....	230
6.1	Winder functions.....	231
6.1.1	Unwinding.....	231
6.1.2	Slitting.....	233
6.1.3	Web separation.....	234
6.1.4	Wind-up.....	235
6.1.5	Automated functions.....	235
6.2	Web spreading.....	236
6.2.1	Spreading the machine-wide, uncut web.....	236
6.2.2	Separating cut webs in a two-drum winder.....	239
6.3	Winder automation.....	243
6.3.1	Automated sequences.....	243
6.3.2	Safety.....	243
6.3.3	Slitter and winding station positioning.....	243
6.3.4	Web threading and splicing.....	244
6.3.5	Core lock/chuck control.....	244
6.3.6	Nip load control.....	244
6.3.7	Web tension and winding force control.....	245
6.3.8	Winder speed control.....	245
6.3.9	Roll quality control and monitor functions.....	246
6.3.10	Diagnostics functions.....	246
6.3.11	Links to other systems.....	247

7	Winder types	248
7.1	Two-drum winders.....	248
7.1.1	Two-drum winding parameters	249
7.1.2	Two-drum winder with air relief	250
7.1.3	Belt-supported winding	251
7.1.4	Variable-geometry winder	251
7.1.5	Winding challenges with two-drum winders	252
7.2	Multi-station winders.....	255
7.2.1	Roll quality and winding parameters.....	256
7.2.2	Multi-station winders used today	257
7.2.3	Process demands for multi-station winding.....	265
7.3	Winding challenges by paper grade.....	266
7.3.1	Newsprint and catalogue paper.....	266
7.3.2	Glossy grades	266
7.3.3	Uncoated woodfree	267
7.3.4	Coated woodfree.....	267
7.3.5	Containerboard	268
7.3.6	Cartonboard and graphical board	268
7.4	Trends	268
7.4.1	Raw materials.....	268
7.4.2	Papermaking and winding.....	268
7.4.3	Roll size	269
8	Theoretical background	269
8.1	Winding theory.....	269
8.1.1	Practical winding tools	271
8.1.2	Winding models	275
	References	282

CHAPTER 3

Roll wrapping and handling

1	Introduction.....	286
2	Roll handling at paper mill	287
2.1	Winder area layouts	287
2.1.1	Level of automation in winder discharge area	288
2.1.2	Two-drum winder discharge area.....	288
2.1.3	Two winders side-by-side	290
2.1.4	Two winders on PM's centre line	290
2.1.5	Discharge area of multi-station winders	291
2.2	Layout considerations	292
2.3	Vertical transport in different layouts.....	294
2.4	Roll sorting	294
2.5	Label orientation	296
2.6	Automated storage.....	297
2.6.1	Automatic storage and automatic retrieval systems (AS/AR).....	297
2.6.2	Automatic vacuum crane storage	297
2.6.3	Automatic crane storage with a roll gripper	298
2.7	Roll upending.....	299
2.7.1	Roll on the bilge, pickup with rotating clamps.....	299
2.7.2	Roll upender.....	299
2.7.3	In-line and side-feed upenders.....	300
2.7.4	Lowering upender	300
2.8	Flat-top conveyors for upended rolls	300
2.9	Roll shipping	301
2.10	Automatic truck loading	301
3	Roll wrapping.....	302
3.1	Paper roll protection.....	302
3.1.1	Requirements for roll wrapping	302
3.1.2	Impact of the paper grade	303

3.2	Wrapping methods.....	307
3.3	Multi-station wrapping machines.....	309
3.3.1	Identification and centring.....	310
3.3.2	Indexing from station to station	311
3.3.3	Wrapper feed and crimping.....	311
3.3.4	Header press.....	313
3.3.5	Head delivery.....	313
3.3.6	Labelling and marking.....	314
3.3.7	Continuous wrapping	315
3.3.8	All wrapping materials on the same side of the machine.....	315
3.3.9	Non-hydraulic systems.....	316
3.4	Single-station wrapping machines.....	316
3.5	Stretch-wrapping machines.....	317
3.6	Wrapping materials.....	318
3.6.1	Wrapper stock.....	318
3.6.2	Inner heads.....	319
3.6.3	Outer heads	319
3.6.4	Gluing and sealing the package.....	320
3.6.5	Labels.....	320
3.6.6	Stretch film	320
4	Process management.....	320
4.1	General.....	320
4.2	System structure.....	321
4.3	Winder and rewinder.....	321
4.4	Roll tracking.....	322
4.5	Intermediate (in-process) storage.....	322
4.6	Wrapping	322
4.7	Roll sorting	323
4.8	Warehouse.....	323
4.9	Shipping	324
4.10	Reports.....	324
4.11	Remote links.....	324
	References	325

CHAPTER 4

Sheet finishing

1	Introduction.....	328
1.1	Sheets and sheet finishing	328
1.2	World production of sheeted paper and board	331
2	Specifications of sheets and their raw materials	331
2.1	Sheet finished products	331
2.1.1	Customer-related requirements.....	332
2.1.2	Quality and housekeeping in sheet finishing	332
2.2	Raw material for sheet finishing.....	334
2.2.1	Effect of winder operations.....	334
2.2.2	Paper and board properties	335
2.2.3	Handling and warehousing	336
2.2.4	Other factors	336
3	Sheet finishing process and machinery	337
3.1	Sheet cutting process	338
3.1.1	Preparing rolls for sheeting	338
3.1.2	Unwinding.....	338
3.1.3	Roll change and splicing	339
3.1.4	Web tension control	340
3.1.5	Web curl compensation.....	341
3.1.6	Web position control.....	341
3.1.7	Slitting	342
3.1.8	Draw roll section.....	344
3.1.9	Cross cutting unit and reject gate.....	344
3.1.10	Overlapping.....	346
3.1.11	Sheet piling.....	348
3.1.12	Other processes	348
3.2	Typical features of sheet cutting machines and factors affecting their selection	349
3.2.1	Folio sheet cutting machines	349
3.2.2	Cut-size machines	356
3.2.3	Guillotines.....	357

4	Packing of sheets	359
4.1	Packing of cut-size sheets	359
	4.1.1 Specifications for cut-size packing.....	359
	4.1.2 Cut-size packing lines.....	360
4.2	Ream wrapping and carton packing of the folio sheets.....	362
	4.2.1 Specifications for folio sheet packing	362
	4.2.2 Ream wrapping and carton packing machinery	362
4.3	Palletising	363
	4.3.1 Requirements for sheet pallet packing	363
	4.3.2 Pallet packing equipment.....	365
5	Other processes in sheet finishing	367
5.1	Co-processes in sheet finishing	367
	5.1.1 Incoming packaging materials.....	367
	5.1.2 Re-piling and sorting.....	368
	5.1.3 Guillotine cutting operations.....	369
	5.1.4 Quality control and traceability of the products	369
5.2	Sheet finishing broke and waste handling	371
	5.2.1 Generation of sheet finishing broke	371
	5.2.2 Handling of broke.....	372
	5.2.3 Minimising the amount of the broke	373
5.3	Roll storage and transport of rolls to the sheet finishing plant.....	374
5.4	Storage of the ready-made sheets	374
5.5	Conditions in a sheet finishing plant.....	376
5.6	Maintenance requirements	377
6	Efficiency of sheet finishing	379
6.1	Sheet finishing capacity	379
	6.1.1 Definition of sheet cutter efficiency	380
	6.1.2 Sheet cutter design	382
	6.1.3 Operational factors.....	385
6.2	Effective sheet finishing production.....	386
	6.2.1 Design capacity.....	386
	6.2.2 Actual capacity.....	387
6.3	Principles and problems of production planning	388
	6.3.1 Folio sheet cutting.....	388
	6.3.2 Cut-size production.....	389
6.4	Cost of sheet finishing.....	389
	References	391
	For further reading.....	393
	Abbreviations.....	397
