

# *Papermaking Science and Technology*

a book series

covering the latest  
technology and  
future trends

*Book 11*

# Pigment Coating and Surface Sizing of Paper

*Second Edition*

## Totally updated version

*Book editor*

Jouni Paltakari, D.Sc. (Tech.), Professor, Department of Forest Products  
Technology, Helsinki University of Technology

*Publisher*

Paper Engineers' Association/Paperi ja Puu Oy

**Paperi ja Puu Oy**

# Table of Contents

|    |  |     |
|----|--|-----|
| 1  | Introduction to pigment coating and surface sizing of paper and board.....     | 11  |
| 2  | Pigment-coated products.....   | 29  |
| 3  | Base paper .....   | 41  |
| 4  | Coating materials – general .....  | 59  |
| 5  | Pigments .....   | 72  |
| 6  | Binders .....  | 191 |
| 7  | Co-binders and thickeners.....   | 226 |
| 8  | Additives .....  | 280 |
| 9  | Surface sizing chemicals .....   | 309 |
| 10 | Rheology of pigment slurries and coating formulations.....                     | 316 |
| 11 | Coating layer consolidation and formation of the coating layer structure ..... | 355 |
| 12 | Coating layer measurement and analysis techniques .....                        | 398 |
| 13 | Coating colour preparation and handling.....                                   | 431 |
| 14 | Coating and surface sizing technologies.....                                   | 460 |
| 15 | Drying of paper coatings and drying equipment.....                             | 557 |
| 16 | Process control and automation in coating machine .....                        | 587 |
| 17 | Development trends and future outlook .....                                    | 597 |
|    | Conversion factors.....  | 605 |
|    | Index.....   | 607 |

# CHAPTER 1

## **Introduction to pigment coating and surface sizing of paper and board**

|          |  |           |
|----------|--|-----------|
| <b>1</b> | <b>Objectives of coating and surface sizing.....</b>             | <b>12</b> |
| <b>2</b> | <b>How coating affects paper properties .....</b>                | <b>13</b> |
| <b>3</b> | <b>Coating colour composition .....</b>                          | <b>14</b> |
| 3.1      | Coating materials.....   | 14        |
| 3.2      | Coating colour preparation — coating formulations .....          | 16        |
| <b>4</b> | <b>Surface sizing – general.....</b>                             | <b>18</b> |
| <b>5</b> | <b>Coating process — general .....</b>                           | <b>18</b> |
| <b>6</b> | <b>Coating process .....</b>                                     | <b>19</b> |
| 6.1      | Coating quality and process runnability.....                     | 23        |
| <b>7</b> | <b>Economics of coating .....</b>                                | <b>24</b> |
| 7.1      | Coating material viewpoint.....                                  | 24        |
| 7.2      | Technological viewpoint .....                                    | 25        |
|          | Appendix — Principle of a form for coating colour make-down..... | 27        |

# CHAPTER 2

## Pigment-coated products

|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Introduction.....</b>                          | <b>30</b> |
| <b>2</b> | <b>Coated paper and board grades.....</b>         | <b>30</b> |
| 2.1      | Coated papers .....                               | 30        |
| 2.2      | Coated boards .....                               | 31        |
| <b>3</b> | <b>End-use demands for coatings.....</b>          | <b>32</b> |
| 3.1      | Printing processes .....                          | 32        |
| 3.1.1    | General printing paper requirements .....         | 33        |
| 3.1.2    | Requirements for offset printing paper .....      | 36        |
| 3.1.3    | Requirements for rotogravure printing paper ..... | 36        |
| 3.1.4    | Requirements for flexo printing paper.....        | 36        |
| 3.1.5    | Requirements for inkjet printing paper .....      | 37        |
| 3.1.6    | Requirements for electrophotography paper.....    | 37        |
| 3.1.7    | Summary of requirements for printing .....        | 37        |
| 3.2      | Converting processes.....                         | 39        |
|          | References .....                                  | 40        |

# CHAPTER 3

## Base paper

|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Introduction.....</b>  | <b>42</b> |
| <b>2</b> | <b>Transport mechanisms .....</b>   | <b>43</b> |
| 2.1      | Coating colour penetration .....  | 43        |
| 2.2      | Coating colour liquid phase penetration .....   | 44        |
| <b>3</b> | <b>General requirements for base papers and how these are influenced .....</b>                        | <b>46</b> |
| 3.1      | Strength and its uniformity.....  | 46        |
| 3.2      | Sheet structure in z-direction .....  | 48        |
| 3.3      | Surface properties and pore structure .....   | 49        |
| <b>4</b> | <b>Interactions between base paper and coating colour – influence on coated paper properties.....</b> | <b>50</b> |
| 4.1      | Coating holdout.....  | 50        |
| 4.2      | Coating consolidation / coating layer structure .....   | 52        |
| 4.3      | Roughening of the base sheet in contact with water .....  | 54        |
| <b>5</b> | <b>Runnability at the coater .....</b>  | <b>54</b> |
|          | References .....  | 56        |

# CHAPTER 4

## **Coating materials – general**

|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Coating pigments – general .....</b>         | <b>60</b> |
| 1.1      | Functions of pigment in the coating layer ..... | 60        |
| 1.2      | Ideal pigment.....                              | 60        |
| 1.3      | Classification of pigments .....                | 61        |
| 1.4      | Key properties of pigments .....                | 62        |
| 1.5      | Criteria for selecting pigments .....           | 65        |
| <b>2</b> | <b>Coating binders – general .....</b>          | <b>65</b> |
| 2.1      | Functions of binders .....                      | 65        |
| 2.2      | Ideal binder.....                               | 65        |
| 2.3      | Types of binder .....                           | 66        |
| 2.4      | Criteria for selecting binders .....            | 67        |
| 2.5      | Binding power of binders .....                  | 68        |
| 2.6      | Binder demand of pigment.....                   | 68        |
| 2.7      | Co-binders and thickeners .....                 | 69        |
| <b>3</b> | <b>Coating additives .....</b>                  | <b>70</b> |
|          | References .....                                | 71        |

# CHAPTER 5

## Pigments

|          |  |           |
|----------|--|-----------|
| <b>1</b> | <b>Kaolin .....</b>  | <b>76</b> |
| 1.1      | Occurrence and mineralogy .....  | 76        |
| 1.2      | Manufacturing coating kaolin grades .....                                  | 78        |
| 1.3      | Properties of coating kaolins .....  | 79        |
| 1.3.1    | Particle shape .....   | 79        |
| 1.3.2    | Particle size.....   | 80        |
| 1.3.3    | Typical physical properties of North American, and Brazilian kaolins.....  | 81        |
| 1.4      | Calcined, structured and engineered kaolins .....                          | 82        |
| 1.5      | Dispersion of kaolins.....   | 84        |
| 1.6      | Flow properties and runnability of kaolin-containing coating colours ..... | 86        |
| 1.7      | Kaolin applications in paper and board coating .....                       | 89        |
| 1.7.1    | Brazilian kaolins.....   | 89        |
| 1.7.2    | North American kaolins .....   | 89        |
| 1.7.3    | Structured and engineered kaolins .....                                    | 90        |
| 1.8      | Compositions and makedown of coating colours containing kaolin.....        | 90        |
| 1.9      | Properties of coated paper containing kaolin.....                          | 91        |
| 1.9.1    | Woodfree topcoating .....  | 94        |
| 1.9.2    | LWC/MWC offset .....   | 95        |
| 1.9.3    | LWC rotogravure .....  | 95        |
| <b>2</b> | <b>Ground calcium carbonate .....</b>                                      | <b>98</b> |
| 2.1      | Material description .....   | 98        |
| 2.1.1    | Classification.....  | 99        |
| 2.1.2    | Methods of manufacture .....   | 99        |
| 2.1.3    | Calcium carbonate — solubility .....                                       | 101       |
| 2.1.4    | Suspension stability — slurries and their response in coating colours..... | 101       |
| 2.1.5    | Product characteristics, availability and handling.....                    | 103       |
| 2.1.6    | Reasons for use in paper coating .....                                     | 104       |
| 2.1.7    | Analytical procedures.....   | 107       |

|          |  |            |
|----------|--|------------|
| 2.2      | Economic and market factors.....   | 108        |
| 2.3      | Future outlook.....  | 108        |
| 2.4      | Acknowledgements.....  | 109        |
| <b>3</b> | <b>Talc .....</b>  | <b>110</b> |
| 3.1      | History of talc in paper .....   | 110        |
| 3.2      | Occurrence and mineralogy .....  | 110        |
| 3.2.1    | Magnesium carbonate derivative ore bodies.....                             | 111        |
| 3.2.2    | Serpentine derivative ore bodies .....                                     | 111        |
| 3.2.3    | Silica aluminous rock derivative ore bodies .....                          | 112        |
| 3.2.4    | Magnesium sedimentary deposit derivative ore bodies.....                   | 112        |
| 3.3      | Mineralogy and morphology of refined coating talc .....                    | 113        |
| 3.3.1    | Structural definition of talc .....  | 113        |
| 3.3.2    | Coating talc morphology.....   | 115        |
| 3.3.3    | Surface free energy of talc and talc/chlorite mixtures.....                | 115        |
| 3.4      | Processes for refining paper coating talc.....                             | 117        |
| 3.4.1    | Raw material refining processes .....                                      | 117        |
| 3.4.2    | Milling.....   | 118        |
| 3.4.3    | Production of talc slurries.....   | 120        |
| 3.4.4    | Delivery forms, costs and logistics .....                                  | 120        |
| 3.5      | Talc applications in paper coating .....                                   | 121        |
| 3.5.1    | Talc in the production of LWC rotogravure publication papers .....         | 121        |
| 3.5.2    | Talc in the production of offset printing grades.....                      | 123        |
| 3.5.3    | Talc in special coating applications .....                                 | 124        |
| 3.6      | Acknowledgements.....  | 124        |
| <b>4</b> | <b>Calcium Sulphate (Gypsum) .....</b>                                     | <b>125</b> |
| 4.1      | Properties of Calcium Sulphate (Gypsum).....                               | 125        |
| 4.1.1    | Physical properties.....   | 126        |
| 4.1.2    | Solubility .....   | 126        |
| 4.2      | Manufacturing .....  | 127        |
| 4.2.1    | Crystallisation .....  | 127        |
| 4.2.2    | Grinding .....   | 128        |
| 4.2.3    | Environmental aspects .....  | 128        |
| 4.3      | Composition and make-down of gypsum-containing coating colours .....       | 128        |
| 4.3.1    | Flow properties and runnability of gypsum-containing coating colours ..... | 129        |
| 4.3.2    | Coating applications of various grades of gypsum .....                     | 130        |
| 4.3.3    | Properties of gypsum-containing coatings and coated papers .....           | 130        |
| 4.3.4    | Coated broke, gypsum solubility and wet end control .....                  | 132        |

## CHAPTER 5

|          |  |            |
|----------|--|------------|
| <b>5</b> | <b>Precipitated calcium carbonate .....</b>                            | <b>134</b> |
| 5.1      | Manufacturing of PCC and PCC coating grades .....                      | 134        |
| 5.2      | Physical properties of PCC coating grades.....                         | 137        |
| 5.3      | Compositions and makedown of coating colours containing PCC.....       | 139        |
| 5.4      | Flow properties and runnability of PCC-containing coating colours..... | 139        |
| 5.5      | Coating applications of various grades of PCC.....                     | 141        |
| 5.6      | Properties of coated papers containing PCC.....                        | 142        |
| 5.7      | Future outlook.....  | 144        |
| 5.8      | Summary.....   | 145        |
| <b>6</b> | <b>Synthetic plastic pigments.....</b>                                 | <b>146</b> |
| 6.1      | Principal classes .....  | 146        |
| 6.2      | Chemical and physical properties.....                                  | 146        |
| 6.3      | Method of manufacture.....   | 148        |
| 6.4      | Shipping, handling, and storage .....                                  | 148        |
| 6.5      | Application and properties .....                                       | 149        |
| 6.5.1    | Typical formulations .....   | 149        |
| 6.5.2    | Rheology.....  | 149        |
| 6.5.3    | Optical performance.....   | 150        |
| 6.5.4    | Specific uses.....   | 150        |
| 6.5.5    | Specialty uses.....  | 151        |
| 6.5.6    | Advancements in hollow-spheres.....                                    | 151        |
| 6.6      | Mechanism of performance .....   | 152        |
| 6.6.1    | Gloss.....   | 152        |
| 6.6.2    | Opacity .....  | 153        |
| 6.6.3    | Brightness.....  | 153        |
| 6.6.4    | Bulk .....   | 153        |
| 6.6.5    | Thermal insulation .....   | 154        |
| 6.7      | Analytical procedures.....   | 155        |
| 6.7.1    | Critical properties and specifications .....                           | 155        |
| 6.7.2    | Measurement methods and techniques.....                                | 155        |
| 6.8      | Economic and market factors.....                                       | 155        |
| 6.9      | Future outlook.....  | 156        |
| 6.9.1    | Market trends and forecast .....                                       | 156        |
| 6.9.2    | Impact of developing technologies .....                                | 156        |
| <b>7</b> | <b>Alumina trihydrate .....</b>  | <b>157</b> |
| 7.1      | Origin.....  | 157        |
| 7.2      | Manufacturing process .....  | 157        |

|          |   |            |
|----------|---|------------|
| 7.3      | Crystal structure .....   | 158        |
| 7.3.1    | Chemical properties .....   | 158        |
| 7.3.2    | Physical properties.....  | 158        |
| 7.4      | Rheological behaviour.....  | 159        |
| 7.5      | Formulation .....   | 159        |
| 7.6      | Coating applications.....   | 159        |
| 7.7      | ATH as an extender.....   | 162        |
| 7.8      | Analytical procedures.....  | 162        |
| 7.9      | Handling and packaging.....   | 163        |
| 7.10     | Future outlook.....   | 163        |
| <b>8</b> | <b>Titanium dioxide .....</b>   | <b>164</b> |
| 8.1      | Introduction .....  | 164        |
| 8.2      | Manufacturing titanium dioxide pigments.....                                      | 164        |
| 8.2.1    | Titanium raw materials .....  | 164        |
| 8.2.2    | Sulphate process .....  | 165        |
| 8.2.3    | Chloride process .....  | 166        |
| 8.2.4    | Surface treatment and finishing .....   | 167        |
| 8.3      | Properties of titanium dioxide pigments .....                                     | 167        |
| 8.3.1    | Chemical and physical properties.....   | 168        |
| 8.3.2    | Optical properties.....   | 169        |
| 8.3.3    | Other properties of $TiO_2$ pigments .....  | 171        |
| 8.4      | Titanium dioxide pigments in paper applications.....                              | 171        |
| 8.5      | Dispersing of titanium dioxide pigments.....                                      | 172        |
| 8.6      | Properties of titanium dioxide pigment slurries.....                              | 172        |
| 8.7      | Properties of coating colours containing titanium dioxide pigment.....            | 173        |
| 8.7.1    | Dry hiding of coating colours.....  | 177        |
| 8.8      | Properties of coatings and coated papers containing titanium dioxide pigment..... | 177        |
| 8.8.1    | Optical properties.....   | 178        |
| 8.8.2    | Interaction of $TiO_2$ with fluorescent whitening agents .....                    | 179        |
| 8.9      | Product safety.....   | 180        |
| 8.10     | Future prospects for titanium dioxide pigment.....                                | 180        |
|          | References .....  | 181        |

# CHAPTER 6

## Binders

|          |  |            |
|----------|--|------------|
| <b>1</b> | <b>Starch .....</b>  | <b>192</b> |
| 1.1      | Origin and manufacture of starch.....  | 192        |
| 1.2      | Handling of starch.....  | 195        |
| 1.3      | Modification of starch .....   | 197        |
| 1.3.1    | Degradation .....  | 198        |
| 1.3.2    | Substitution.....  | 198        |
| 1.4      | General characteristics of starch as a binder in surface sizing and coating.....           | 198        |
| 1.4.1    | Surface sizing .....   | 198        |
| 1.4.2    | Coating .....  | 200        |
| 1.5      | Effects of starch on the properties of paper and board in sizing and coating.....          | 204        |
| 1.5.1    | Surface sizing .....   | 204        |
| 1.5.2    | Coating .....  | 204        |
| <b>2</b> | <b>Latex .....</b>   | <b>207</b> |
| 2.1      | Introduction .....   | 207        |
| 2.2      | What is a “latex”? .....   | 207        |
| 2.3      | Physicochemical characterisation of polymer dispersions used as paper coating binders..... | 208        |
| 2.4      | Emulsion polymerisation .....  | 210        |
| 2.5      | Storage and handling of latexes .....  | 212        |
| 2.6      | Types of paper coating latexes and their characteristics.....                              | 213        |
| 2.6.1    | PVAc latexes .....   | 214        |
| 2.6.2    | Acrylic based latexes .....  | 214        |
| 2.6.3    | Styrene-butadiene latexes.....   | 214        |
| 2.6.4    | Other latexes.....   | 215        |
| 2.6.5    | Properties of styrene-acrylic and styrene butadiene-latexes .....                          | 215        |
| 2.7      | Impact of latex on the paper coating process and paper quality .....                       | 218        |
| 2.7.1    | Influence of latex on the coating colour .....   | 218        |
| 2.7.2    | Coated Paper .....   | 219        |
| 2.7.3    | Printing .....   | 221        |
| 2.8      | Trends and outlook.....  | 224        |
|          | References .....   | 225        |

# CHAPTER 7

## Co-binders and thickeners

|          |   |            |
|----------|---|------------|
| <b>1</b> | <b>Carboxy methyl cellulose .....</b>   | <b>228</b> |
| 1.1      | Introduction .....  | 228        |
| 1.2      | Manufacturing and chemistry of CMC .....                                      | 228        |
| 1.3      | CMC grades for sizing and pigment coating of paper.....                       | 229        |
| 1.4      | Addition of CMC to the coating colour mixture.....                            | 230        |
| 1.5      | Effect of CMC on coating colour water retention properties .....              | 230        |
| 1.6      | Effect of CMC on coating colour flow properties .....                         | 233        |
| 1.7      | Effect of CMC on coating properties .....                                     | 234        |
| <b>2</b> | <b>Soy protein.....</b>   | <b>237</b> |
| 2.1      | Introduction .....  | 237        |
| 2.2      | Origin, manufacturing, and chemistry.....                                     | 237        |
| 2.3      | Soy protein product range.....  | 240        |
| 2.4      | Key mechanism in coatings .....   | 241        |
| 2.5      | Coating rheology.....   | 241        |
| 2.6      | Runnability and water-holding capacity.....                                   | 243        |
| 2.7      | Anti-blocking and calender hazing .....                                       | 243        |
| 2.8      | Soy protein coating: formulation strategy .....                               | 244        |
| 2.9      | Preparation of soy protein for coating formulations .....                     | 244        |
| 2.10     | Conclusion.....   | 245        |
| <b>3</b> | <b>Polyvinyl alcohol .....</b>  | <b>246</b> |
| 3.1      | Manufacture .....   | 246        |
| 3.2      | Composition, structure, and properties .....                                  | 246        |
| 3.3      | Dissolution procedure, speed of dissolution and aging of PVOH solutions ..... | 247        |
| 3.4      | Polyvinyl alcohol grades for coating .....                                    | 248        |
| 3.5      | Effect on coating colour/flow properties .....                                | 248        |
| 3.6      | Polyvinyl alcohol as coating binder.....                                      | 250        |

|          |   |            |
|----------|---|------------|
| 3.7      | Polyvinyl alcohol for surface sizing .....  | 251        |
| 3.8      | Effect on optical brightening agents/carrier properties .....                     | 252        |
| 3.8.1    | Mechanism of PVOH as a carrier .....  | 252        |
| 3.8.2    | Comparison of different co-binders .....  | 252        |
| 3.8.3    | Which PVOH grade to select for optimum whiteness.....                             | 253        |
| 3.8.4    | Amount of PVOH to be used.....  | 253        |
| 3.8.5    | Which OBA works best with PVOH.....   | 253        |
| 3.8.6    | Performance/economy balance when using OBA/PVOH combinations.....                 | 254        |
| <b>4</b> | <b>Synthetic co-binders and thickeners by.....</b>                                | <b>256</b> |
| 4.1      | Introduction .....  | 256        |
| 4.2      | Synthetic thickeners .....  | 256        |
| 4.2.1    | Chemical structure.....   | 256        |
| 4.2.2    | Main functions of thickeners .....  | 258        |
| 4.2.3    | Thickening mechanisms in the aqueous phase.....                                   | 258        |
| 4.2.4    | Thickening mechanisms in the coating colour .....                                 | 259        |
| 4.2.5    | Influence of synthetic thickeners on water retention.....                         | 260        |
| 4.2.6    | Rheology of synthetic thickeners.....   | 262        |
| 4.3      | Associative thickeners .....  | 263        |
| 4.3.1    | Chemical structure and classification .....                                       | 263        |
| 4.3.2    | Associative thickeners in comparison with conventional synthetic thickeners ..... | 266        |
| 4.4      | Synthetic co-binders.....   | 267        |
| 4.4.1    | Chemical structure.....   | 267        |
| 4.4.2    | Main functions of co-binders.....   | 268        |
| 4.5      | Influence of co-binders and thickeners on coating properties .....                | 268        |
| 4.5.1    | Binding power and water resistance .....  | 269        |
| 4.5.2    | Brightness and opacity.....   | 269        |
| 4.5.3    | Smoothness and gloss .....  | 269        |
| 4.5.4    | Porosity, print gloss and glueability.....  | 270        |
| 4.5.5    | Printability.....   | 270        |
| 4.6      | Application.....  | 271        |
| 4.6.1    | Preparing coating colours.....  | 271        |
| 4.6.2    | Applications in coatings applied to different grades of paper .....               | 272        |
| 4.7      | Summary .....   | 273        |
|          | References .....  | 275        |
|          | For further reading about soy protein .....                                       | 278        |

# CHAPTER 8

## Additives

|          |   |            |
|----------|---|------------|
| <b>1</b> | <b>Introduction.....</b>  | <b>282</b> |
| <b>2</b> | <b>Coating dispersants.....</b>                                     | <b>282</b> |
| 2.1      | Dispersion.....   | 282        |
| 2.1.1    | General aspects concerning dispersions.....                         | 282        |
| 2.1.2    | Wetting .....   | 283        |
| 2.1.3    | Disruption of particle clusters .....                               | 283        |
| 2.1.4    | Stabilisation .....   | 284        |
| 2.2      | General aspects concerning dispersants .....                        | 285        |
| 2.3      | Amount of dispersant required for stabilisation.....                | 286        |
| 2.4      | Dispersant types .....  | 287        |
| 2.4.1    | Polyacrylate salts.....   | 287        |
| 2.4.2    | Other dispersants.....  | 287        |
| <b>3</b> | <b>Foam control agents in surface sizing and paper coating.....</b> | <b>287</b> |
| 3.1      | Physicochemical basis of foam formation and stabilisation .....     | 288        |
| 3.2      | Physicochemical basis of foam control.....                          | 289        |
| 3.3      | Foam and foam control in surface sizing and paper coating .....     | 290        |
| 3.3.1    | Process design and mechanical foam control.....                     | 290        |
| 3.3.2    | Chemical foam control .....   | 291        |
| 3.3.3    | Methods of foam measurement.....                                    | 291        |
| 3.3.4    | Dosage of foam control agents.....                                  | 291        |
| 3.3.5    | Adverse effects of foam control agents.....                         | 292        |
| 3.4      | Conclusion .....  | 292        |
| <b>4</b> | <b>Water retention, rheology modifiers and pH control .....</b>     | <b>292</b> |
| <b>5</b> | <b>Optical brightening agents .....</b>                             | <b>295</b> |
| 5.1      | Chemical structure and fluorescence .....                           | 295        |
| 5.2      | Types of optical brightener .....                                   | 296        |
| 5.3      | Role of carrier .....   | 297        |

|          |  |            |
|----------|--|------------|
| <b>6</b> | <b>Lubricants .....</b>                      | <b>298</b> |
| 6.1      | Calcium stearate.....                        | 298        |
| 6.2      | Wax emulsions.....                           | 299        |
| 6.3      | Other lubricants .....                       | 299        |
| <b>7</b> | <b>Insolubilisers.....</b>                   | <b>299</b> |
| 7.1      | Types of insolubiliser.....                  | 299        |
| 7.1.1    | Glyoxal and its resin derivatives .....      | 300        |
| 7.1.2    | Melamine- and urea-formaldehyde resins ..... | 300        |
| 7.1.3    | Zirconium-based crosslinkers .....           | 300        |
| 7.2      | Use of crosslinkers.....                     | 301        |
| <b>8</b> | <b>Preservatives .....</b>                   | <b>302</b> |
| 8.1      | Types of preservative.....                   | 303        |
| 8.2      | Conclusions .....                            | 304        |
|          | References .....                             | 306        |

# CHAPTER 9

## Surface sizing chemicals

|          |   |            |
|----------|---|------------|
| <b>1</b> | <b>Background and target of surface sizing .....</b>    | <b>310</b> |
| <b>2</b> | <b>Surface sizing materials.....</b>                    | <b>310</b> |
| 2.1      | Starch.....   | 311        |
| 2.2      | Carboxy methyl cellulose .....                          | 312        |
| 2.3      | Polyvinyl alcohol .....                                 | 312        |
| 2.4      | Surface sizing additives .....                          | 312        |
| <b>3</b> | <b>Effect of size properties in sizing process.....</b> | <b>313</b> |
| <b>4</b> | <b>Surface size formulations .....</b>                  | <b>313</b> |
| <b>5</b> | <b>Pigmented surface sizing .....</b>                   | <b>314</b> |
|          | References .....  | 315        |

# CHAPTER 10

## Rheology of pigment slurries and coating formulations

|          |   |            |
|----------|---|------------|
| <b>1</b> | <b>Introduction.....</b>  | <b>318</b> |
| <b>2</b> | <b>Definitions of key rheological terms.....</b>                | <b>319</b> |
| <b>3</b> | <b>Types of flow behaviour .....</b>                            | <b>320</b> |
| 3.1      | Shear-rate-dependent rheology .....                             | 320        |
| 3.2      | Time-dependent rheology .....                                   | 322        |
| 3.3      | Viscosity of suspensions .....                                  | 323        |
| <b>4</b> | <b>Viscoelasticity.....</b>                                     | <b>325</b> |
| 4.1      | Measurement of viscoelasticity .....                            | 326        |
| 4.2      | Stress-relaxation experiments.....                              | 329        |
| 4.3      | Creep experiments.....  | 329        |
| 4.4      | Normal forces .....   | 330        |
| 4.5      | Viscoelasticity of paper coatings .....                         | 331        |
| <b>5</b> | <b>Extensional viscosity.....</b>                               | <b>331</b> |
| <b>6</b> | <b>Measurement of viscosity .....</b>                           | <b>332</b> |
| 6.1      | Controlled-strain versus controlled-stress measurement.....     | 332        |
| 6.2      | Measuring devices for rotational rheometers.....                | 333        |
| 6.3      | Capillary rheometers.....                                       | 336        |
| 6.3.1    | Correction for inertial effects .....                           | 336        |
| 6.3.2    | Correction for non-Newtonian fluids .....                       | 337        |
| 6.3.3    | Correction for end effects.....                                 | 337        |
| 6.3.4    | Correction for wall-slip effects .....                          | 338        |

|          | References .....   | 352        |

# CHAPTER 11

## **Coating layer consolidation and formation of the coating layer structure**

|          |  |            |
|----------|--|------------|
| <b>1</b> | <b>Introduction.....</b>   | <b>356</b> |
| 1.1      | Wet coating structure.....   | 357        |
| 1.2      | Association between pigments and latex.....                                    | 358        |
| 1.3      | Association between pigment, latex and starch.....                             | 359        |
| 1.4      | Association between pigment, latex and CMC .....                               | 361        |
| 1.5      | Coating-base paper interaction .....   | 364        |
| <b>2</b> | <b>Coating consolidation.....</b>  | <b>367</b> |
| 2.1      | Introduction .....   | 367        |
| 2.2      | Water flow from coating to base paper, water retention and immobilisation..... | 367        |
| 2.3      | Coating coverage and immobilisation.....                                       | 371        |
| 2.4      | Coating consolidation mechanisms .....   | 372        |
| 2.5      | Coating consolidation in blade coating .....                                   | 375        |
| <b>3</b> | <b>Dry coating structure.....</b>  | <b>376</b> |
| 3.1      | Packing and volume fraction of pigment.....                                    | 376        |
| 3.2      | Openness of the coating layer .....  | 376        |
| 3.3      | Surface properties .....   | 377        |
| 3.4      | Structure of coating layer and its thermal properties .....                    | 378        |
| <b>4</b> | <b>Modelling of coating consolidation and coating structure .....</b>          | <b>380</b> |
| 4.1      | Consolidation, dewatering and immobilisation.....                              | 380        |
| 4.2      | Pore structure simulation .....  | 385        |
|          | References .....   | 390        |

# CHAPTER 12

## Coating layer measurement and analysis techniques

|          |  |            |
|----------|--|------------|
| <b>1</b> | <b>Introduction.....</b>   | <b>400</b> |
| <b>2</b> | <b>Surface structure .....</b>   | <b>400</b> |
| 2.1      | Topographical mapping.....   | 400        |
| 2.1.1    | Stylus profilometry .....  | 401        |
| 2.1.2    | Optical profilometry.....  | 401        |
| 2.1.3    | Confocal microscopy .....  | 402        |
| 2.1.4    | Scanning probe microscopy .....  | 402        |
| 2.1.5    | Optical interferometry .....   | 403        |
| 2.1.6    | Stereoscopy .....  | 403        |
| 2.1.7    | Air flow roughness .....   | 403        |
| 2.2      | Coefficient of friction.....   | 404        |
| 2.3      | Optical imagery.....   | 404        |
| 2.4      | Contact angle analysis .....   | 404        |
| 2.4.8    | Fluid droplets .....   | 404        |
| 2.4.9    | Immersion and extraction .....   | 405        |
| 2.5      | Optical properties.....  | 405        |
| 2.5.10   | Gloss.....   | 405        |
| 2.5.11   | Dynamic print gloss .....  | 405        |
| 2.5.12   | Goniophotometry.....   | 406        |
| 2.5.13   | Specular reflectance uniformity.....                                   | 407        |
| <b>3</b> | <b>Chemical distribution and chemical composition of coating .....</b> | <b>407</b> |
| <b>4</b> | <b>Bulk structure .....</b>  | <b>408</b> |
| 4.1      | Mercury porosimetry.....   | 408        |
| 4.2      | Fluid imbibition .....   | 412        |
| 4.3      | Air permeability.....  | 413        |
| 4.4      | Staining .....   | 413        |

|          |  |            |
|----------|--|------------|
| 4.5      | Brightness, colour and opacity .....                                   | 413        |
| 4.6      | Transmitted light imaging.....   | 414        |
| 4.7      | Coating burnout imaging.....   | 414        |
| 4.8      | Transmitted electron imaging.....                                      | 414        |
| 4.9      | Applicability of the Kubelka-Munk theory .....                         | 414        |
| 4.10     | Physical cross sectioning and imaging .....                            | 414        |
| 4.11     | Neutron scattering .....   | 416        |
| 4.12     | X-ray diffraction .....  | 416        |
| <b>5</b> | <b>Effects of coating structure on measurements and analysis .....</b> | <b>417</b> |
| 5.1      | Brightness, opacity, and colour.....                                   | 417        |
| 5.2      | Sheet gloss.....   | 417        |
| 5.3      | Print gloss.....   | 417        |
| 5.4      | Print mottle .....   | 418        |
| 5.5      | Offset halftone dot fidelity .....                                     | 419        |
| 5.6      | Blister resistance .....   | 419        |
| 5.7      | Glueability and surface strength.....                                  | 420        |
| 5.8      | Rotogravure printability.....  | 420        |
| 5.9      | Inkjet printability .....  | 421        |
| <b>6</b> | <b>Conclusions.....</b>  | <b>421</b> |
|          | References .....   | 422        |

# CHAPTER 13

## **Coating colour preparation and handling**

|          |  |            |
|----------|--|------------|
| <b>1</b> | <b>Introduction.....</b>   | <b>432</b> |
| <b>2</b> | <b>Coating colour chemicals – their share of material flows and logistics.....</b> | <b>433</b> |
| <b>3</b> | <b>Basic design data of coating colour plants .....</b>                            | <b>433</b> |
| <b>4</b> | <b>Delivery and storage of coating chemicals .....</b>                             | <b>434</b> |
| <b>5</b> | <b>Handling of pigments .....</b>  | <b>434</b> |
| 5.1      | Pigment make-down.....   | 434        |
| 5.2      | Industrial batch-type dispersers.....  | 438        |
| 5.3      | Commercial pigment slurries .....  | 441        |
| <b>6</b> | <b>Processing of binders.....</b>  | <b>442</b> |
| 6.1      | Latexes.....   | 442        |
| 6.2      | Starch processing in coating colour plants .....                                   | 443        |
| 6.2.1    | Batch cooking of starch.....   | 444        |
| 6.2.2    | Continuous cooking and conversion of starch.....                                   | 445        |
| 6.3      | Polyvinyl alcohol .....  | 446        |
| 6.4      | Protein.....   | 447        |
| 6.5      | Preparation of additives .....   | 447        |
| <b>7</b> | <b>Coating colour preparation process .....</b>                                    | <b>449</b> |
| 7.1      | Batch preparation of coating colours.....  | 449        |
| 7.2      | Continuous coating colour preparation .....  | 451        |
| <b>8</b> | <b>Coating colour supply systems for coaters .....</b>                             | <b>452</b> |
| <b>9</b> | <b>Ultrafiltration process.....</b>  | <b>455</b> |
|          | References .....   | 459        |

# CHAPTER 14

## **Coating and surface sizing technologies**

|          |   |            |
|----------|---|------------|
| <b>1</b> | <b>Introduction.....</b>                      | <b>462</b> |
| <b>2</b> | <b>Coating machine .....</b>                  | <b>462</b> |
| 2.1      | General .....                                 | 462        |
| 2.2      | Future of coating machines.....               | 465        |
| 2.3      | Coating machine components .....              | 465        |
| 2.3.1    | Flying splice unwind.....                     | 465        |
| 2.3.2    | Off-machine tail threading.....               | 466        |
| 2.3.3    | On-machine tail threading.....                | 466        |
| 2.4      | Coating section web run .....                 | 468        |
| 2.5      | Multiple coating of paper and board .....     | 469        |
| <b>3</b> | <b>Blade coating techniques.....</b>          | <b>472</b> |
| 3.1      | Coating station types .....                   | 472        |
| 3.1.1    | Applicator roll coating station .....         | 472        |
| 3.1.2    | Short dwell coating station .....             | 474        |
| 3.1.3    | Jet applicator coating station .....          | 475        |
| 3.2      | Metering systems .....                        | 477        |
| 3.2.1    | Blade metering.....                           | 477        |
| 3.2.2    | Forces acting on the blade .....              | 478        |
| 3.3      | Blade loading systems .....                   | 483        |
| 3.3.1    | Tube loading .....                            | 483        |
| 3.3.2    | Constant tip angle loading .....              | 485        |
| 3.3.3    | Bent blade loading .....                      | 487        |
| 3.3.4    | CD control of coat weight .....               | 488        |
| <b>4</b> | <b>Surface sizing and film coating .....</b>  | <b>491</b> |
| 4.1      | Introduction .....                            | 491        |
| 4.2      | Surface sizing and coating techniques .....   | 492        |
| 4.2.1    | Pond size press.....                          | 495        |
| 4.2.2    | Film size press.....                          | 495        |
| 4.2.3    | Sizing and coating process layouts.....       | 497        |
| 4.3      | Size amount and coat weight development ..... | 498        |
| 4.3.1    | Film metering process.....                    | 498        |
| 4.3.2    | Film transfer process .....                   | 505        |

|          |   |            |
|----------|---|------------|
| 4.4      | Effect of running parameters on starch penetration and consequent paper and board quality ..... | 514        |
| 4.4.1    | Starch penetration analysis method .....  | 514        |
| 4.4.2    | Effect of linear load and nip dwell time on starch penetration .....                            | 515        |
| 4.5      | Size press technology for different paper and board grades .....                                | 518        |
| 4.5.1    | Printing and writing paper grades .....   | 518        |
| 4.5.2    | Paperboard grades.....  | 523        |
| 4.5.3    | Specialty paper grades .....  | 525        |
| <b>5</b> | <b>Spray coating .....</b>  | <b>527</b> |
| 5.1      | Spray coating process.....  | 527        |
| 5.2      | Integrated coating colour management for spray coating .....                                    | 527        |
| 5.3      | Industrial applications/installations .....   | 528        |
| <b>6</b> | <b>Curtain coating .....</b>  | <b>529</b> |
| 6.1      | Introduction .....  | 529        |
| 6.2      | Application and metering in curtain coating.....  | 529        |
| 6.2.1    | Principle.....  | 529        |
| 6.2.2    | Types of curtain coater.....  | 529        |
| 6.2.3    | Curtain generation .....  | 530        |
| 6.2.4    | Curtain impingement and elongation .....  | 532        |
| 6.3      | Coating colour considerations in curtain coating .....  | 532        |
| 6.3.1    | Rheology.....   | 533        |
| 6.3.2    | Curtain stability .....   | 533        |
| 6.3.3    | Deaeration .....  | 534        |
| 6.4      | Coating layer development and structure .....   | 535        |
| 6.5      | Curtain coating process layouts .....   | 535        |
| 6.5.1    | Specialty papers .....  | 535        |
| 6.5.2    | Commodity grades .....  | 536        |
| <b>7</b> | <b>New technologies .....</b>   | <b>537</b> |
| 7.1      | Introduction .....  | 537        |
| 7.2      | Modified coating techniques .....   | 537        |
| 7.2.1    | Spot/pattern coating — coating specific areas.....  | 537        |
| 7.2.2    | Transfer and cast coating — forming the coating layer separately .....                          | 537        |
| 7.3      | Methods with reduced water and energy consumption.....  | 538        |
| 7.3.1    | Foam coatings — from special additives to pigment coatings .....                                | 538        |
| 7.3.2    | Wet end coatings — making use of paper drying .....   | 538        |
| 7.4      | Waterless coating methods .....   | 539        |
| 7.4.1    | Powder coating .....  | 539        |
| 7.4.2    | Thin surface treatments — also used to improve printability.....                                | 543        |
| 7.4.3    | Radiation curable coatings .....  | 543        |
| 7.4.4    | Hot melt and lamination methods.....  | 544        |
| <b>8</b> | <b>Summary.....</b>   | <b>545</b> |
|          | References .....  | 547        |

# CHAPTER 15

## Drying of paper coatings and drying equipment

|          |  |            |
|----------|--|------------|
| <b>1</b> | <b>Introduction.....</b>   | <b>558</b> |
| <b>2</b> | <b>Heat and mass transfer in the drying of a coated web.....</b> | <b>558</b> |
| <b>3</b> | <b>Infrared drying .....</b>                                     | <b>560</b> |
| 3.1      | Introduction .....   | 560        |
| 3.2      | Principles of radiation drying.....                              | 561        |
| 3.3      | Electrical IR dryers.....  | 562        |
| 3.4      | Gas IR dryers .....  | 564        |
| <b>4</b> | <b>Air drying .....</b>  | <b>565</b> |
| 4.1      | Air dryer types .....  | 565        |
| 4.2      | Operating parameters .....                                       | 566        |

# CHAPTER 16

## **Process control and automation in coating machine**

|          |   |            |
|----------|---|------------|
| <b>1</b> | <b>Introduction.....</b>                                | <b>588</b> |
| <b>2</b> | <b>On-line coat weight measurement methods .....</b>    | <b>588</b> |
| 2.1      | Oven-dry weight difference measurement.....             | 589        |
| 2.2      | Ash difference measurement method.....                  | 590        |
| 2.3      | Direct coat weight measurement method.....              | 591        |
| <b>3</b> | <b>Machine-direction coat weight control .....</b>      | <b>592</b> |
| 3.1      | Start-up control.....                                   | 593        |
| <b>4</b> | <b>Cross-direction coat weight profile control.....</b> | <b>594</b> |
| <b>5</b> | <b>Machine-direction moisture control .....</b>         | <b>595</b> |
| 5.1      | Drying optimisation.....                                | 596        |
| <b>6</b> | <b>Cross-direction moisture control.....</b>            | <b>596</b> |

# CHAPTER 17

## Development trends and future outlook

|   |   |     |
|---|---|-----|
| 1 | Pigments .....  | 598 |
| 2 | Binders .....   | 600 |
| 3 | Co-binders and thickeners.....                              | 601 |
| 4 | Coating and sizing methods and technology .....             | 602 |
| 5 | Drying technology.....                                      | 603 |
| 6 | Measurement and automation technology.....                  | 603 |
| 7 | Analysis techniques, modelling and simulation methods ..... | 604 |
