

Papermaking Science and Technology

a book series
covering the latest
technology and
future trends

Book 19

Environmental Management and Control

Second Edition

Totally updated version

Book editor

Dahl Olli, Dr.Tech., Professor, Helsinki University of Technology

Publisher

Finnish Paper Engineers' Association/Paperi ja Puu Oy

Paperi ja Puu Oy

Table of Contents

1	Introduction.....	9
2	Environmental controls	19
3	Environmental permits for industry	47
4	Raw water treatment.....	55
5	Process modifications to reduce effluent loads.....	69
6	Effluent treatment.....	85
7	Reducing emissions to air.....	117
8	Solid and liquid wastes	137
9	Other environmental impacts and their reduction	167
10	Tools for environmental management	177
11	Appendix 1	177
12	Appendix 2	275
13	Appendix 3	278
14	Appendix 4	283
15	Appendix 5	289
	Conversion factors.....	293
	Index.....	295

CHAPTER 1

Introduction

1	General	10
1.1	Origin of environmental load	10
1.2	Process modifications	11
2	Environmental loads from the pulp and paper industry	12
2.1	Water	13
2.2	Air	15
2.3	Wastes	16
	References	18

CHAPTER 2

Environmental controls

1	General	20
2	Regulatory controls and environmental issues in the EU	21
2.1	Environmental protection policy	22
2.2	Basic principles.....	23
2.3	EU Environmental Action Programmes.....	26
2.4	Environment-related information and the European Environment Agency (EEA)	27
2.5	European Pollutant Emissions Register	27
3	EU environmental protection law in the pulp and paper sector	27
3.1	Environmental impact assessment	28
3.2	Integrated Pollution Prevention and Control – The IPPC Directive	28
3.3	Control of major-accident hazards (The COMAH or Seveso II Directive).....	31
3.4	Packaging and Waste Packaging Directive	32
3.5	The REACH Regulation	33
3.6	Landfill Directive	34
3.7	VOC Solvents Directive.....	34
3.8	Waste Incineration Directive.....	35
3.9	Large Combustion Plants Directive.....	35
3.10	Greenhouse Gas Emission Trading Directive	36
3.11	Environmental Liability Directive	37
4	Other measures and issues	37
4.1	Climate change policy.....	37
4.2	Sustainable consumption and production.....	38
4.3	Integrated Product Policy	38
4.4	Greening of public procurement.....	39
4.5	EU Waste Framework Directive.....	40
4.6	Eco-Management and Audit Scheme (EMAS)	41
4.7	Environmental labels	41
5	Economic and market instruments	41
6	Regulatory control in Finland	43
6.1	Finnish environmental protection legislation	43
6.2	Environmental protection administration in Finland	44
	References	46

CHAPTER 3

Environmental permits for industry

1	Location-related environmental permits	48
2	Environmental impact assessment	48
3	Integrated Pollution Prevention and Control (IPPC)	50
3.1	Best Available Techniques (BAT)	52
	References	54

CHAPTER 4

Raw water treatment

1	Quality requirements	56
2	Impurities	57
3	Treatment methods and equipment	58
3.1	Mechanical treatment	59
3.2	Chemical treatment	61
3.2.1	Chemicals used	61
3.2.2	Rapid mixing	63
3.2.3	Flocculation	63
3.2.4	Clarification	64
3.2.5	Filtration	65
3.2.6	Disinfection	66
3.3	Other treatment methods	66
4	Water supply system	67
	References	68

CHAPTER 5

Process modifications to reduce effluent loads

1	General	70
2	Sulphate pulp	71
3	Mechanical pulps.....	77
4	Recycled fibre	80
5	Paper and board.....	80
	References	83

CHAPTER 6

Effluent treatment

1	Effluent loads	86
1.1	General	86
1.2	Measurement of effluent discharges	87
1.3	Discharge levels from manufacturing processes	88
2	Solids removal	89
2.1	Clarification, flotation and filtration	89
2.2	Chemical coagulation and flocculation	97
3	Biological methods	98
3.1	Activated sludge process	98
3.2	Other aerobic treatments	109
3.3	Anaerobic processes	110
4	Other treatment methods	112
4.1	Activated carbon adsorption	112
4.2	Evaporation	113
4.3	Stripping	113
4.4	Chemical oxidation	114
5	Removal of organic matter in effluent treatment	114
	References	116

CHAPTER 7

Reducing emissions to air

1	Air emissions	118
1.1	General	118
1.2	Emissions from manufacturing processes	119
2	Process modifications to reduce air emissions	120
2.1	General	120
2.2	Malodorous gas control	120
	2.2.1 Concentrated malodorous gases	122
	2.2.2 Dilute malodorous gases	123
2.3	Flue gas control	125
	2.3.1 Recovery boiler	125
	2.3.2 Lime kiln	126
	2.3.3 Air emissions from bark boilers	127
2.4	Bleaching gas control	128
3	Particulate control	128
3.1	General	128
3.2	Electrostatic precipitation	129
3.3	Venturi scrubber	131
3.4	Cyclones	131
4	Gaseous emissions control	132
4.1	Sulphur dioxide emissions	132
4.2	Nitrogen oxide emissions	134
4.3	Carbon dioxide emissions	135
5	Other treatment methods	135
	References	136

CHAPTER 8

Solid and liquid wastes

1	Introduction.....	138
2	Wastes from different production processes	138
2.1	Sulphate pulping.....	138
2.2	Mechanical pulping.....	139
2.3	Recycled fibre processing	139
2.4	Paper and board making.....	139
3	Characteristics of wastes.....	140
3.1	Sludges	140
3.2	Ashes	142
3.3	Other wastes	144
4	Sludge handling.....	146
4.1	General.....	146
4.2	Dewatering.....	146
	4.2.1 General.....	146
	4.2.2 Equipment.....	148
4.3	Residue management.....	151
	4.3.1 Incineration.....	151
	4.3.2 Landfilling	153
	4.3.3 Soil improvement.....	158
	4.3.4 Composting.....	159
	4.3.5 Wet oxidation.....	161
	4.3.6 Utilisation in the production process.....	162
	4.3.7 Production of other products from sludge.....	162
5	Disposal of other wastes.....	163
6	Waste related issues	163
	References	165

CHAPTER 9

Other environmental impacts and their reduction

1	Control of major accident hazards.....	168
2	Noise and vibration abatement.....	170
3	Emissions to soil and groundwater	172
4	Transport.....	174
5	Wood procurement	175
	References:.....	176

CHAPTER 10

Tools for environmental management

1	Economic calculations.....	178
1.1	Environmental and economic information — OECD.....	178
1.2	End-of-pipe and integrated technologies.....	178
1.3	Best Available Techniques (BAT).....	179
1.4	BAT Reference Document (BREF) for the pulp and paper industry.....	179
1.5	BAT in the pulp and paper industry.....	180
1.6	Horizontal BREF on Economics and Cross-Media Effects.....	180
1.7	BAT — Practical examples from the Finnish pulp and paper industry.....	181
1.8	BAT — Environmental impact, costs and cross media issues — UK approach.....	182
2	Environmental management systems.....	183
2.1	EMS Standards.....	184
2.2	Basic stages in an EMS.....	186
2.3	Comparison of ISO 14001 and EMAS.....	186
2.4	The ISO 14001 Environmental Management Standard.....	187
2.5	Environmental reporting.....	191
3	Environmental impact assessment.....	191
4	Life-Cycle Assessment – LCA.....	193
4.1	LCA — Computer models.....	196
4.2	The application of LCA.....	197
4.2.1	Finnish Environment Institute (SYKE) - LCA Waste Project.....	197
4.2.2	Use of LCA in education.....	198
4.3	Life cycle management.....	199
5	Environmental labelling (Eco-Labels).....	199
5.1	Eco-label types.....	200
5.2	ISO Standards for environmental labelling.....	200
5.3	Multi-criteria labels.....	201
5.3.1	The Nordic Swan.....	201
5.3.2	European Community Flower Eco-labelling Scheme.....	204
5.4	Other multi-criteria labels.....	205
5.5	Single-criterion labels.....	206
5.5.1	Forest certification.....	207
5.5.2	Programme for the Endorsement of Forest Certification Schemes (PEFC).....	207
5.5.3	Forest Stewardship Council (FSC).....	207
5.5.4	Finnish forest certification initiatives.....	207
5.6	Eco-profiles and self-declaration environmental claims and symbols.....	208
	References.....	209

APPENDIX 1

1	Environmental Legislation, Regulations, Guidance and Executive Authorities.....	214
2	European Environmental Legislation	214
2.1	General.....	214
2.1.1	Freedom of access to information	214
2.1.2	Environmental impact assessment	214
2.1.3	Strategic environmental assessment.....	215
2.1.4	Integrated pollution prevention and control (IPPC)	215
2.1.5	Control of major-accident hazards (COMAH)	216
2.1.6	Habitats	216
2.1.7	Environmental liability	216
2.1.8	Conventions concluded by the Community	217
2.2	Water pollution control legislation	217
2.2.1	Dangerous substances	217
2.2.2	Water Framework Directive	218
2.2.3	Urban waste water treatment.....	219
2.2.4	Nitrates Directive	219
2.2.5	Groundwater Directive	220
2.2.6	Other directives.....	220
2.2.7	Conventions concluded by the Community	221
2.3	Air pollution control legislation	221
2.3.1	Air quality directives.....	221
2.3.2	Emission Ceilings Directive	222
2.3.3	Emissions Trading Directive.....	222
2.3.4	Large combustion plants.....	222
2.3.5	Protection of the ozone layer	223
2.3.6	Other measures to prevent air pollution.....	223
2.3.7	Conventions concluded by the Community	223
2.4	Waste management legislation	224
2.4.1	Framework Directive on Waste	224
2.4.2	Hazardous waste.....	224
2.4.3	Landfill.....	224
2.4.4	Incineration of waste.....	225
2.4.5	Trans-frontier shipments of waste.....	225
2.4.6	Packaging and waste packaging	225

2.4.7	Other waste related directives	226
2.4.8	Conventions concluded by the Community	226
2.5	Finnish environmental protection law	226
2.5.1	Environmental Protection Act 2000.....	226
2.5.2	Water pollution control	230
2.5.3	Air pollution control	230
2.5.4	Climate change.....	231
2.5.5	Waste management	232
2.5.6	Compensation for environmental damage	234
2.5.7	The Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) Regulation.....	235
2.5.8	Regulations for environmental impact assessment (EIA)	235
2.5.9	The EU Eco-Management and Audit Scheme (EMAS)	236
2.5.10	Economic instruments.....	236
2.5.11	Safety in handling of hazardous chemicals and explosives	240
2.6	EU Emission level guidance for the forest industry	241
2.6.1	BAT for kraft pulping — for reducing emissions to water.....	241
2.6.2	BAT for kraft pulping — for reducing emissions to air	242
2.6.3	BAT for sulphite mills — for reducing emissions to water.....	243
2.6.4	BAT for sulphite mills — for reducing emissions to air	244
2.6.5	BAT for mechanical pulp mills	244
2.6.6	BAT for recovered paper processing mills.....	245
2.6.7	BAT for Papermaking and related processes.....	246
2.6.8	BAT for auxiliary boilers.....	247
3	US Environmental protection legislation	249
3.1	General environmental legislation	249
3.2	The Cluster Rules.....	250
3.3	Regulations on effluent discharges.....	251
3.4	Regulations on atmospheric emissions	255
3.5	Regulations on waste disposal	266
3.6	Environmental Impact Assessment (EIA)	267
3.7	Executive authorities.....	268
4	International Conventions	269
4.1	The Espoo Convention and Kiev Protocol	269
4.2	The Convention for the Protection of the Marine Environment of the North East Atlantic (OSPAR).....	269
4.3	The Helsinki Convention and HELCOM	270
4.4	Nordic Council	273
	References	274

APPENDIX 2

1	The ISO 14000 Series of Standards – Environmental Management	276
1.1	Environmental Management Systems	276
1.2	Auditing	276
1.3	Environmental Labels.....	277
1.4	Life Cycle Assessment	277
1.5	Other Guides.....	277

APPENDIX 3

1	Life Cycle Assessment (LCA)	279
1.1	General.....	279
1.2	Methodology.....	279
1.3	ISO 14040 – Life Cycle Assessment – Principles and Framework.....	280
1.3.1	Goal and scope definition.....	281
1.3.2	Life cycle inventory analysis.....	281
1.3.3	Life cycle impact assessment.....	281
1.3.4	Life cycle interpretation.....	282

APPENDIX 4

1	Economic calculations — OECD	284
2	Classification of Environmental Protection Activities (CEPA)	284

APPENDIX 5

1	Waste water	290
2	Fresh water	291
3	Air quality.....	291
4	Air quality, stationary source emissions.....	292
5	Waste management.....	292
