31.1.2022 Virtual event

D A Y

Join us for virtual FBI DAY

The forest industry is once again providing over 3,000 summer jobs for students. Companies in the industry need a wide range of enthusiastic workers and stand-ins for the summer holidays to work in production, laboratory and research work as well as logistics and projects. Many experts have begun their career path with successful contacts made in summer jobs.

At the virtual FBI day (Forest Based Industries Day) on January 31, 2022, you will get to get to know companies in the field and will have possibility discuss about summer job opportunities with them.

The application time for summer internships is now open!

Valmet

Valmet's internships in production, logistics, design, project operations, economy, IT and automation sectors offer a great opportunity to get to know working life in about 300 different summer jobs all around Finland.

Based on previous experiences, summer employees are brisk, open to new methods of working, hard working and interested in learning more about Valmet's products and practices.

Kemira

Kemira has dozens of summer jobs in production plants in Oulu, Joutseno, Äetsä, Pori and Harjavalta, as well as in the R&D centre in Espoo.

We have good experiences with young employees: they bring a new enthusiastic attitude with them and many summer employees have been permanently employed by Kemira after their studies.

“The forest industry employs more than 40,000 people in Finland and almost 100,000 people throughout the production chain.”

Sappi

Most of Sappi Kirkniemi's approximately 90 summer job positions are in production; mass and papermaking and energy production. In addition, there are positions in the maintenance and laboratory work and sample service. Office tasks are mainly related to production and transport planning. Most of our summer jobs is shift work, where you can earn quite comfortable summer earnings. Every summer, a few people are also hired in manager positions where they also gain managerial experience. We offer good and comprehensive orientation to all our summer jobs.

A career path in Kirkniemi can lead to important positions. An example of this is a plant manager, whose career in forest industries began with summer work in the Kirkniemi plant.

Rejlers

At Rejlers, you'll find interesting tasks, opportunities to develop your skills, and nice colleagues! We operate in more than 20 different locations, including Vantaa, Kemi, Turku and Joensuu.

Industry, building services, railways, telecommunications or energy and power grid design – our business covers all of these services.

During the internship, you always get to participate in actual customer projects and receive orientation for the work in your field.

VTT

VTT's internships in Espoo are sought-after. This summer we are hiring 2-4 people for research projects to perform information search, laboratory work and piloting during the summer holidays.

The motivation of VTT is to change the world, and a summer job also provides an excellent possibility to do that.

"The industry also offers a lot of international career opportunities."

Suzano

Suzano, the world's leading producer of eucalyptus pulp and one of Latin America's largest paper producers, exports to more than 80 countries and, through its products, plays a part in the lives of over two billion people. Suzano has more than 35,000 direct and indirect employees and for over 90 years has invested in innovative solutions based on eucalyptus cultivation that enable it to substitute the use of fossil-based materials with renewable bio-based materials.

Stora Enso

Stora Enso's summer jobs are very diverse. Workers are sought for about 50 different positions, including process and maintenance workers, forest experts, laboratory workers and IT and communications professionals. In summer 2022, more than 800 summer workers will be recruited.

The summer workers get to dive in hands-on work. Many return over and over again, and it is not uncommon for summer jobs during studies to lead to permanent jobs after graduation.

Metsä Group

Metsä Group offers hundreds of summer jobs all around Finland. Most summer jobs are focused on production, maintenance and forestry services.

Office work is also available in the fields of financial management, procurement, research and development, sales, marketing, customer service and IT.

In the forest sector, you can work for a sustainable future and promote the globalisation of fossil-free materials. There are many interesting and versatile work assignments in which you can also continuously develop your skills.

Andritz

Andritz Oy recruits annually tens of summer trainees to different functions and locations in Finland. Summer jobs vary from R&D, engineering, technical sales, project operations and service to quality, purchasing, finance and accounting and IT.

We are interested in students specializing in mechanical engineering, energy technology, chemical engineering, process engineering, biotechnology, material science, automation and electrical engineering. Some job opportunities are also available for economics/business and information technology students.

BillerudKorsnäs

Process, laboratory, warehouse and forklift work, production and logistics planning, environment and quality, mechanical maintenance, automation maintenance, HR and communications are areas where BillerudKorsnäs needs interns for the summer.

According to the experiences of previous years, summer workers have been eager to work and willing to learn new things, and in return, we have gained good concrete ideas. Some have also remained permanent employees.

More information on summer jobs in the sector is available on the websites of companies and on the job advertisement pages of educational institutions and recruitment companies.

UPM

This summer, UPM will offer approximately 750 summer jobs and internships for young professionals – both for those at the beginning of their studies as well as for more responsible positions. We have different production tasks in sawmills, plywood mills, biorefineries and paper and pulp mills. Many have begun their careers with summer internships and continued into more and more diverse permanent positions.

www.upm.com/kesatyot

Vision Hunters

Vision Hunters supports companies in the forest and bioproduct industries in strategic decision-making and operational optimisation. We follow at close range where the companies in the sector are headed and are involved in developing ideas and future guidelines. The work is fast-paced and highly instructive, involving information searching, reporting of results and close cooperation with customers.

This summer we offer a position for one summer employee. In addition, we are looking for a newly graduated analyst for a permanent employment. Typically, summer trainees also have the opportunity to continue working part-time in addition to their studies and then as a full-time employee after graduation.
